

## No Hoods. No Vents. No Problem!

Take a look at how AutoFry makes deep frying as easy as 1, 2, 3!

1) Place food in entry chute and close to load in fryer

2) Select fry time on keypad or select programmable presets

3) Food is fried to perfection and automatically delivered to exterior receiving tray

**Consistent Quality** - Each AutoFry is built with SimpliFry technology, a revolutionary heat/time compensation intelligence that **automatically adjusts cooking time based on the quantity of product being prepared.** This means no matter how large or small the food input is, you can be sure the product is cooked to the same degree of perfection every time.

**Ventless Operation** - You'll save money with AutoFry as there is no need to install any costly vents or hoods to operate. **AutoFry filters grease laden air through a three-step filter system with clean air venting from the top of the machine.** Without needing to be located under a hood, AutoFry is also easy to relocate in the event of a remodel.

**Reliability** - The AutoFry Mini-C has only **three moving parts, providing less opportunity for breakdown.** This means you can count on your fryer to work well for you day in and day out.

**Made to Order** - Our **single-serve, double basket countertop model of AutoFry is compact and efficient,** perfect for businesses looking to promote a fresh made-to-order concept.

**Employee Safety** - AutoFry is fully enclosed and fully automated, keeping employees safe from hot oil and heating elements. AutoFry's built in ANSUL fire suppression system creates **the ultimate safe frying environment.**

**High Return on Investment** - Fried foods continue to be the most cravable and easy-profit making food items in foodservice. With **high profit margins and short cook times, fried foods provide a quick return on investment.**

# AutoFry<sup>®</sup> MTI-MiniC SPECIFICATIONS

## AutoFry Mini-C
